

Let's have a look at the new resource available from the project!

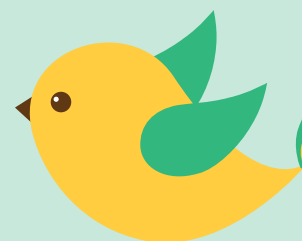

The **Pedagogical Sequences and Gamified Activities** are a resource for kindergarten teachers that is meant to help engaging children to understand their role in environmental sustainability and foster a responsible & sustainable behaviour. The 16 lessons are divided into 3 topics.

1. Ocean pollution

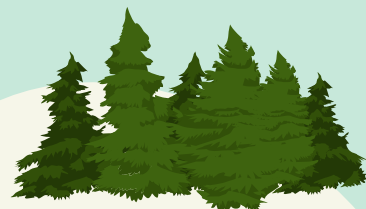

The topic raises awareness of the importance of life in the oceans, how they impact us, what threatens them and how we can preserve them.

Check this out!
greenguardens.com

2. Deforestation

The topics introduces eco-systems, explores the link between soils and forests, looks at biodiversity threats how to adress them.

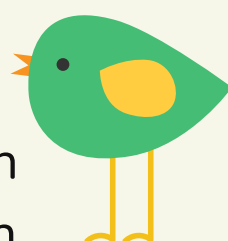

3. Air Pollution

This topics explores the main sources of air pollution, clean energy sources, and looks at the the ethical aspects of combating climate change, as well as need to adapt to changing circumstances.

Upcoming activities

1. Training of kindergarten teachers on environmental sustainability and green entrepreneurship.
2. Local Training Activities in preschools.
3. "Green GUARDens of the Future": An Audiovisual Implementation Report

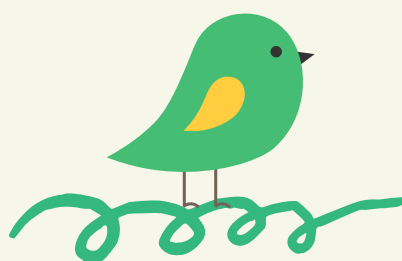

And many more! Stay tuned
